Original Equipment Manufacturer (OEM)

Our priority is to minimize your total cost of ownership and extend the service life of your assets.

Quality

As an OEM provider, we are constantly testing, updating and improving our equipment to ensure superior quality and value of your investment. Safety is of utmost importance to us and by utilizing our services, we make sure your equipment is operating correctly and effectively. In addition, we employ rigorous quality processes to yield dependable field performance. Some of these processes include the use of Certified Weld Inspectors, Magnetic Particle Inspections and product drawings with accurate material specifications. By allowing us to inspect and repair, we eliminate the risk of non-comforming third party parts.

Support

We have a vast amount of resources available to help you manage your inventory and equipment. We offer engineering support and access to equipment records via the NOV Tracker program 24/7/365. Also we can conduct customized training and on site evaluations to fit and assess your needs.

Value

We are your single-source provider for all of your drilling requirements. Protect your investment and prolong the life of your product by utilizing OEM guidance and spare parts and the backing of the Manufacturer's Warranty.
