

Rig Technologies

Aftermarket Operations Baku

Bringing service and repair to you

Repair Workshop located close to Baku along Salyan Highway bringing OEM availability to the Caspian Region.

Our highly qualified and experienced personnel are trained in the repair of a large variety of NOV equipment from inspection through to recertification.

By providing repairs through our facility locally, we aim to cut down the requirement for any equipment export to different locations minimising cost and maximising equipment availability and uptime.

Certifications: ISO certified – ISO 9001:2015

Aftermarket - Baku Repair Facility
