

# Rolligon Aftermarket Service Packages

## Take control of your equipments' life — it's in your hands.

We maximize our customers' performance and uptime, applying our unmatched complete system knowledge and investment in networks of people, facilities, and technologies.

### Reduce your total cost of ownership with our aftermarket solutions.

Keeping your equipment running at optimum performance is important. At NOV, we have created a safety net for your operations, so that you can operate with less manpower. We have a total aftermarket solution that works with your operations and maintenance departments to keep your equipment up and running. To ensure reliability throughout your equipment's life, we offer extensive product maintenance programs customized to your needs and updated as those needs change and evolve with the industry. Our processes are simple, transparent, and created with end users in mind.

By utilizing our extensive testing facilities, all equipment is verified prior to service, and any repair or modifications are validated before shipment.

### Common equipment serviced
