

# 8079 Mini Service Center

Our 8079 Mini Service Center provides a safe and easy way to make and break tool joint connections on small OD tools and pipes. A fully hydraulic system, the 8079 Mini Service Center operates at a low working pressure and can be powered by a variety of power sources. The open-mouth design allows for easy loading and unloading of the work piece.

## Features and Benefits

- **Safe and easy to use** – can be easily operated by one person.
- **Easily maneuvered** – rigid, compact design can be positioned in various shop layouts.
- **Reduced risk of crushing and slippage** – adjustable clamp force is proportional to the torque during make/break operations.
- **Secure while operating** – clamp arm holds work pieces in the service center.
- **Universal tong dies** – one set for entire OD range can be easily changed when worn.

## Technical Data

<b>Tool OD range</b>	1 <sup>1</sup> / <sub>16</sub> in. to 3 <sup>1</sup> / <sub>2</sub> in.
<b>Distance between jaws</b>	3 in.
<b>Minimum torque</b>	350 ft-lb
<b>Maximum torque</b>	4,200 ft-lb
<b>Operating pressure</b>	2,900 psi
<b>Required flow</b>	4 gpm
