

# Perforating Gun Protection

## Helping you deliver protected pipe. All day, every day.

MSI Pipe Protection Technologies has manufactured perforating gun protectors for the oil and gas industry for over 20 years. Our proprietary thread protectors provide superior thread engagement and design features, ensuring the many vital components within your perforating gun remain free from moisture and outside elements.

Unprotected perforating guns can expose your operation to unintended risks, resulting in downtime. Using a threaded protector precisely machined to your exact thread profile can prevent unwanted damage to threads, ensuring proper make-up. Safeguard your operation by using a product that fully engages your threads and keeps charges moisture free.

Trusted by industry leading experts, MSI offers the most extensive selection of thread protectors for commonly found connections in the perforating industry.

ISO 9001: 2015 | ISO 14001: 2015 | OHSAS 18001: 2007

### What We Offer

- Standard black color for cost reduction; custom color options available on request
- Protection options available for both external and internal threads
- Complete coverage of threaded area
- O-ring options
- Most styles can accommodate installation equipment
- Materials include: HDPE, LDPE, LLDPE, Nylon, and Polypropylene
- Size ranges: 1/16 in. – 7 in.; custom sizes available

### Our Capabilities

- Highly-skilled personnel and industry-expert technicians
- In-house designs and on-site tool room
- Robotics and automated parts handling systems
- Injection molding and CNC lathe operations
- Ample warehouse space to accommodate any agreed stocking needs
