

HANDLING DRILL CUTTINGS IN A SAFE, EFFICIENT MANNER WITH A MINIMIZED PROFILE

Our cuttings box (skip) incorporates innovative features, which allows for improved safety and ease of operation. Built to DNV 2.7-1/EN12079 and certified by Lloyds Register, these stackable skips are able to contain a payload of 18,519 lb (8,400 kg), while maintaining a height of only 48 1/4 in (1227 mm). Contact your NOV sales representative for more information.

FEATURES	BENEFITS
High-capacity payload and stackable design	Provides large capacity with a minimized footprint.
Low height profile	Eliminates the dangers of working at heights.
Carboline* Bitumastic* 200 m, coal tar epoxy internal coating	Long skip life with minimum maintenance
