

# CUSTOMIZING PORTABLE POWER WITH PROVEN, EFFECTIVE DESIGN AND QUALITY SERVICE

Portable Power provides diesel powered light towers for land use that quietly supplies light to any land based job site. All units are built to withstand the harshest environments, employing heavy duty, sound attenuated housings and stainless steel components.

Portable Power light towers meet or exceed all requirements for operation on land based job sites. Standard features include forklift pockets, circuit breakers and trailer mounted. Easy operating instructions are included with each unit.

The NOV Portable Power group has highly trained technical teams of mechanics and electricians. The technical support staff is available to the energy and construction industry for both land based and offshore work sites. Services include job surveys, hook ups, troubleshooting and maintenance. Technicians are available 24 hours a day, 7 days a week.

NOV Portable Power has the solution for all of your power and temperature control needs.

8KW Diesel Light Tower (mast retracted)

FEATURES	BENEFITS
Large Fuel Tank	Extended run time in remote areas between fueling
Full Spill Containment	Holds up to 110% of engine oil capacity and fuel to protect environments
Forklift Pockets	Ease of loading/unloading and transportation
3 Point Stabilizers	Allows light towers to withstand wind gust up to 65mph
Gull-Wing Style Doors	Easy access to all major service components with no RUST
External Oil Drain	Easily drain used oil during services
(4) 1250 Watt Metal Halide Bulbs	Burns brighter than most other industry bulbs allowing for less shadows
Sound Attenuated Housing	Reduces noise in work areas allowing units to be placed near projects
Hydraulic Vertical Lifting	Safe and easy lifting operation to place lighting in exact location needed
Generator Disconnect	Allows light tower to double as generator with 220volt, 1 phase 50 amp Hubble twist lock plug
Artic Rated	Each unit equipped with engine block heater and Arctic rated battery available
