

# Midstream

With over 65 years of manufacturing closures, providing valves and pumps for the midstream industry, we have become an industry leader.

Our Midstream group is a leading provider of API 6D valves, ASME "U" stamped quick opening closures and pumps for LACT units to the oil and gas industry. Our products are used throughout the global midstream distribution and transmission markets, these products include our gate valves, ball valves, plug valves, check valves, threaded closure, internal door closures, clamp style closures and progressive cavity pumps. It is our goal to provide safe, quality and reliable products to our customers.

## Valves

We are a leading provider of API 6D valves to the oil and gas industry. Our products are used throughout the global midstream distribution and transmission markets and include products such as, gate valves, ball valves, plug valves, and check valves.

Products and services include:

- Expanding Gate & Plug Valves
- Slab Gate Valves
- Trunnion Mounted Ball Valves
- Swing Check Valves
- Aftermarket Services

## Closures

We manufacture closures for large and small diameter applications with a focus on safety and ease-of-operation.

Our products include:

- Sentry™ Closures
- Yale™ Closures

# Midstream

## Pumps

---

The oil and gas industry encompasses all of the steps involved in finding, producing, transporting and marketing oil and natural gas. Our competitively priced Moyno™ progressing cavity pumps offer best value and application versatility. The proprietary gear joint design effectively handles radial and thrust loads for maximum performance and long life.

Midstream applications for our pumps include:

- LACT Systems
- Pipeline Boosters
- Terminal Boosters
- Truck Offloads
- Tank Recycles/Treater Returns
- Sumps
