Elmar
Products and Services
Creating the Complete Wireline Solution

Our vision is to be globally recognised as the supplier of wireline equipment products, after sales support and training against which all others are measured.

The Elmar product range covers wireline trucks and winches, masts, wireline pressure control equipment, slickline tools, flow control equipment, hydraulic control units and tubular products.

High quality Elmar®, DynaWinch, Artex and ASEP equipment are manufactured in our seven major plants. We can provide a wireline service company with the full package it needs to perform an intervention – from the winch unit to the pressure control to the tools. We have equipment to suit any need but the one thing that all our products have in common is that they can be relied upon.

After Sales and Service

Elmar’s after sales team is available 24 hours a day enabling an immediate global response to client needs.

Since its inception in late 2010, Elmar’s after sales Department has played an extremely important role in the growth of our business and has differentiated us from other suppliers of Well Service Equipment. Worldwide, the after sales team has a workforce of over 100 people, which is increasing steadily as our business grows. We have after sales dedicated management and support teams based in the USA, Canada, UK, Netherlands, Singapore, Australia, UAE, Saudi Arabia, CIS and Norway. These support centres help maximise the efficiency of our customers’ operations anytime, and anywhere, in the world.

Elmar utilizes a unique after sales software system, enabling support cases and customer queries to be monitored globally, ensuring cases are handled professionally, and avoiding recurrences. In addition we have a dedicated professional engineering team to support our clients. This is a significant differentiator in the marketplace and demonstrates our level of commitment to provide high quality services as well as products.

For after sales support visit www.nov.com/Elmar and click After Sales Support Request or call us at one of the regional numbers indicated.

After Sales Products and Services

• Worldwide service
• Support, service, commissioning and spare parts
• WPCE service, maintenance and recertification
• Wireline unit/truck and mast maintenance, refurbishment and recertification
• Rental of WPCE, wireline units, masts and ancillary equipment
• Spooling, wire supply and maintenance service
• Training

ASEP Products

We have been making high quality wireline equipment since 1981, of which much is still in use. Our customers can choose from a range of certification levels for their ASEP products including zone II, CE/ATEX and various DNV and EN standards. Our Automation Products group designs and manufactures the SmartMonitor and LineMinder control panels, as well as the technology behind our now field proven fully electric e-winch design.

Skid mounted units, combination crane and winch units, and power packs

Our Products

Our products are what have made us so well-known and require little introduction. Equipment from the 6 product lines (shown below) is available for rental or for sale. Contact your nearest NOV Elmar office for more details.

We offer a range of customised DynaWinch products from our Calgary, Canada manufacturing centre. The products are supported globally by Elmar’s sales and after sales group and by our dedicated Canadian service centres in Calgary and Edmonton. Products are assembled on both North American and European chassis, and are built for either desert or extreme cold weather conditions.

DynaWinch products
- Custom designed logging and slickline trucks
- Swab rigs
- Combined mast and derrick units
- Integrated crane and winch units
- Extreme Arctic and desert environment units
- Specialised support vehicles and containers

Artex manufactures a range of wireline trucks at the Brenham, Texas facility. We take pride in our trucks which are custom built by experienced craftsmen to a very high standard of finish, and they are supported by a dedicated after sales team based at Brenham and available to support all our customers’ needs. Our units are thoroughly tested in our test well, and with our service offering will last for many years.

Artex products
- Custom designed logging and slickline trucks
- Swab rigs
- Combined mast and derrick units
- Integrated crane and winch units
- Specialised support vehicles and containers

Elmar mast units are reliable and safe. We offer a range of offshore and truck mounted masts from 35 ft to 95 ft, and to suit all requirements, be they restricted lifting capability, reduced deck area or Zone I area usage. We recommend the mast operations training provided by our after sales team, which will ensure that your team can carry out a competent and efficient operation.

Elmar mast units
- Slickline mast units
- Wireline mast units
- Truck mounted wireline mast units

Manufacturing of Screens

Elmar has been producing wire wrapped screens under licence since 1995 and has a capacity of 150 joints per week, with a range of base pipe sizes from 4” to 9 5/8”.

Documents are maintained for customer assurance of full traceability of materials and control of procedures.

Manufacturing of Tubular Perforating Gun Hardware

Elmar manufactures tubular completion equipment to client’s own drawings and specifications. All tubular manufacture is subject to agreed and documented quality assurance processes, and relevant certification and documentation is provided. Our three tubular product lines are Perforating Guns, Slotted and Holed Casing, and Screen products. For further information contact your local sales representative or visit www.nov.com/Elmar.

Elmar Wireline Tools

Elmar manufactures a wide range of slickline tools, to a very high quality standard. The Elmar range is comprised of all standard conveyance tools and advanced tools such as power jars (hydraulic and spring), mechanical combination tools and mechanical tubing punch perforators.

The universal pulling tool is a field proven alternative to conventional pulling tools and reduces the amount of tools required in a toolbox, owing to its adjustable core length and the ability to change its mode of shearing. The brand new Roller Conveyance System (RCS) enables access to highly deviated well bores with its simple, robust design. Tools can be manufactured with GLS, HD or SR connections, or as an alternative with Elmar’s high strength Breach Lock connection.

**Wireline Tools products**
- Conveyance
- Fishing
- Debris removal
- Tubing punch
- Bespoke
