

# Fleet Care

# Re-Certification

At NOV we understand that every customer has different requirements, time considerations, and a fleet, whether onshore or offshore, that needs individual attention and planning related to class requirements (SPS), inspections and maintenance. Our global team of experts work with you to help with your unique re-certification needs - keeping your rig and equipment running on time and on budget.

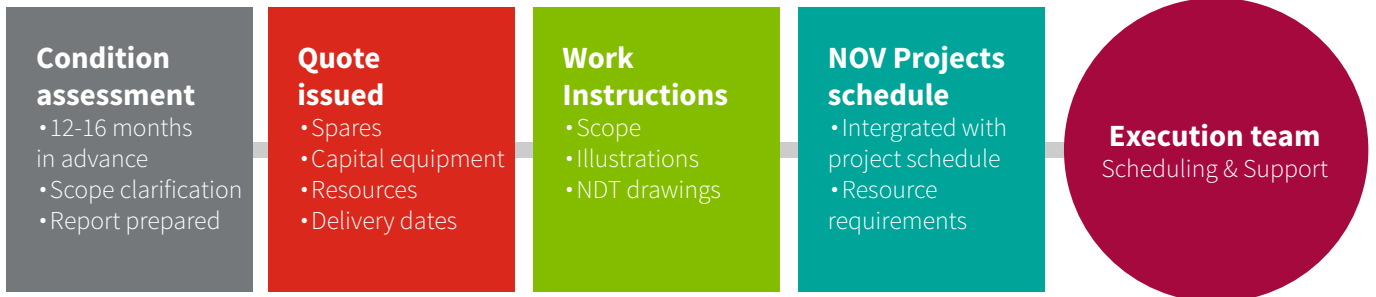

## Re-Certification

With over 30 years of re-certification experience and 40 full re-certification projects since 2013, we work with you to understand how we can help to carry out your unique re-certification needs in the most efficient way. Our experienced team will provide support through the NOV corporation and coordinate all activities related to the equipment re-certification project. By optimizing the work scope and ensuring a reduction in yard stay, we help you save time and money - maximizing your uptime.

### The global footprint to support your Re-Certification needs

## Make it happen

- Uptime & money saved through infield certification
- Reduced onshore time through careful planning and execution
- The optimal solution to meet your unique challenges
- OEM Knowledge of your entire fleet
- Lessons learned from decades of experience
- Certificate of Conformance (COC) and Statement of Facts (SOF) documentation
- Implement PIB's (Product Improvement Bulletins) during re-certification execution
- NOV Warranty
