

Petro-chemical Refinery Piping

Application: Demineralized water lines

Location: El Tablazo, Estado Zulia, Venezuela

Client: PDVSA Oil & Gas

Pipe System: Approximately 4900 feet (1500 m) of 8-inch diameter, Bondstrand Series 2000 pipe and filament-wound fittings were installed in this petrochemical complex in Venezuela. The piping transports demineralized water to the entire complex. Installed in 1974, the Bondstrand piping system has provided trouble-free service for 24 years.

Product: 8" (200mm) Bondstrand® Series 2000 pipe, filament wound fittings, Quick-Lock® joining system

Features & Benefits: Corrosion resistance - Bondstrand is inherently resistant to corrosion and scale build up. It exhibits excellent flow characteristics with a Hazen Williams rating of 150.

Ease of installation - Light weight fiberglass is easy to handle and install.
