

# North America Wireline Services and Aftermarket

**Completion &  
Production Solutions**

# Committed to keeping your operations running

Just as NOV is the leading oilfield equipment provider, our aftermarket capabilities are also world-class.

In today's capital-constrained environment, we realize the need to maximize the life of your asset as well as maximize the return on your investment. We pride ourselves on building high-quality, long-lasting equipment, and we work with you to upgrade, refurbish, and adapt your assets to current market requirements.

With a combination of training, certifications, and experience, our technicians utilize thorough testing procedures based upon ISO approved quality management systems. All equipment is verified prior to service, and any repair or modification is validated before shipment.

## Complete Wireline Support

### Always available to provide immediate support for your operations

When you demand reliable, responsive, and affordable wireline equipment and services, you can count on us to meet your needs. We have facilities strategically located to provide OEM equipment and support exactly where you need to keep you working safely and efficiently in today's challenging operations.

We provide first-line technical support and spare parts supply as well as offer equipment servicing from routine annual inspections to complete rebuild and recertification to the original third-party design standard.

### Strategically located to support your North American operations

We have strategically located facilities in the United States and Canada. These locations provide easy access from most basins and are conveniently located near the international ports of New Orleans and Houston, allowing for efficient support for your Gulf of Mexico, US land, and global operations.

Having more than 100 years of combined experience in the service and operation of wireline pressure control and winch units, our service teams are ready and able to support all of your aftermarket needs.

### Services provided

- Unit service, repair, and refurbishment
- WCPE service, repair, and recertification
- Rentals
- Spare parts
- Training

### Unit service, repair, and refurbishment

We perform a full range of service on all your wireline products to extend the life of your assets, including repair and refurbishments. From the smallest cosmetic defect to a complete unit overhaul and rebuild, we can handle all of your needs. Using the same OEM parts and manufacturing specifications, we bring your equipment back to a like-new condition. Additionally, we can also refurbish your equipment from any manufacturer using the same quality standards.

### WCPE service, repair, and recertification

To ensure continued operations at maximum potential, we provide service and recertification for all our products. By using only OEM spares, we eliminate the risks associated with unauthorized third-party replacement parts while extending the life cycle of your equipment. In every situation, you can rely on our highly trained personnel to assess, repair, test, and return your assets to active service in no time.

To ensure continued operations at maximum potential, we provide service and recertification for all NOV wireline and flowline product lines, including: Anson, Artex, ASEP, Axelson, DynaWinch, and Elmar.

## Rentals

Our North American facilities offer wireline rental equipment that our customers can take advantage of during activity spikes or maintenance downtime. Our superior products allow you to maintain operational efficiency and productivity with no capital outlay.

**Rentals are available for short-term or on discounted long-term contracts, including:**

- Elmar WPCE sets from 3 to 6 in. and 10K, 12.5K, and 15K psi MWP
- Elmar big-bore QuickLatch™ system with 7.06-in. ID and 15K-psi working pressure
- Elmar 70- and 90-ft hydraulic wireline mast units with jib extensions
- Elmar hydraulic and grease control modules and pressure test units

## Spare Parts

We provide a full range of spare parts that preserve the integrity of your asset. Made from the same high-quality material as the original equipment, our 100% OEM spare parts are designed to fit your needs with every delivery. We offer a true collaboration that helps improve your jobsite's performance, reliability, and safety.

On-time delivery of quality products at competitive prices is our commitment to keeping you running. We address your needs by providing and delivering professional, helpful, high-quality service and assistance before, during, and after the initial sale.

We understand that the availability of original equipment manufacturer (OEM) spare parts is critical to your equipment's uptime and reliability.

## Training

As part of our commitment to provide a safe and reliable workforce, we offer an array of training programs covering the operation and maintenance of your equipment. We partner with you to integrate training packages and equipment tailored to fit the specific needs of your operations. Industry-leading experts facilitate our programs at either customers or our own facilities. Whether you are looking to gain knowledge on your equipment's functionality or improve the safety of your operations, our goal is to ensure you leave the course with the confidence and skills to keep your job sites running.
