

OrionNET v3.5 Release Summary

November 2022

CTES™ OrionNET™ v3.5 is now available. Customers with current software maintenance contracts will have access to this new version of OrionNET.

New Features

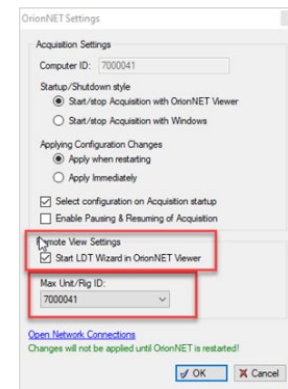

- Dark mode
- LDT auto-push. All channels pushed to Max Completions
- New Manual & Derived System Channels
- Predefined Comments updated

Enhancements

LDT Auto-push:

- First-time setup through the Configuration Utility is required to confirm the setting
- If updating OrionNet, the Max Unit/Rig ID will be remembered otherwise it defaults to “None” for a new install
- No longer will you have to select channels to transmit, all channels are transmitted
- Go to Setup > Settings to check if LDT is turned on

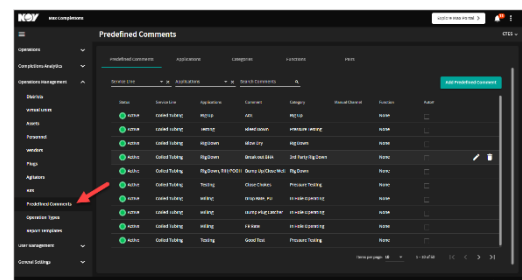

New Manual & Derived System Channels:

- Manual channels are set from the Job Setup section under Comments, which are used to calculate derived channels
- Custom Manual Channels can be created from comments.
- Ex. FR Rate > Add the channel in System Channel as a data channel. A popup window will appear when the FR Rate Comment is clicked, and the value entered will populate in the FR Rate data window

Predefined Comments Updates:

- Predefined comments are loaded from Max Completions
- Predefined comments are based on selected Service Line within the Configuration Utility

Upgrade to OrionNET v3.5

OrionNET users with a valid software maintenance contract may download the current version from www.nov.com/ctes.

Downloading OrionNET v3.5

1. Navigate to the CTES software download center: <https://ctes.nov.com/CustomerPortal/ProductDownloads>
 - a. Input your Username and Password to access the appropriate file.
 - b. To obtain password information or to renew a software license, contact CTES for assistance: +1.936.777.6200 or CTESkeys@nov.com.
