Jotun FPSO, Norway

Customer/End User: Worley/Vår Energi
Solution: Fuel gas skid for FPSO modification.

Delivered: 2021

Inspirer TEG, Norway

Customer/End User: Maersk/Repsol
Solution: TEG regeneration skid and contactor for jackup modification.

Delivered: 2019

Bellevue & Jordan, Australia

Customer/End User: QGC
Solution: Replacement gas compressor scrubbers with high performance demisting internals.
Delivered: 2016

Terra Nova FPSO, Newfoundland

Customer/End User: Wood/Suncor
Solution: New gas scrubbers, modification of production separators, and gas dehydration system.
Delivered: 2019/2020

Selected References Brownfield Process Packages & Mod.

Helang FPSO, Malaysia

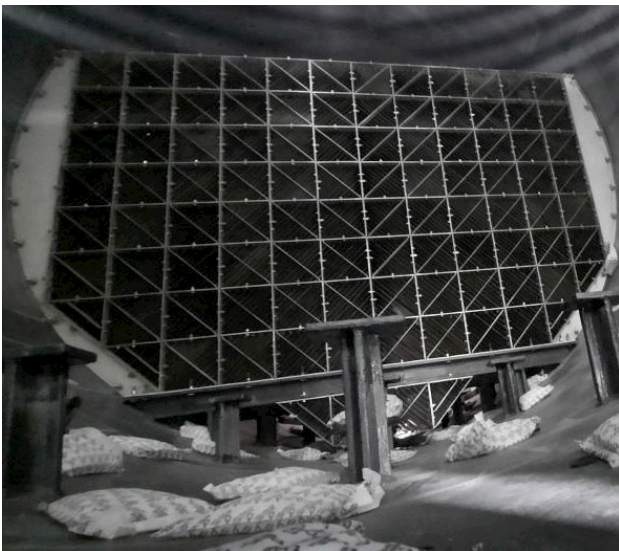

Customer/End User: Yinson
Solution: HP flare KOD for FPSO modification. 9 different packages were delivered.
Delivered: 2019

Badu 5 refinery, Slovakia

Customer/End User: Slovnaft
Solution: Two-stage electrostatic desalters replacing existing spherical gravity settlers in refinery.
Delivered: 2017

Rumalia, Iraq

Customer/End User: PEG/ROO
Solution: 370,000 BWPD produced water skimmer vessel with NOV ZSQ inlet device, ZVE baffle & coalescer plate pack.
Delivered: 2020

Peshkabir, Iraq

Customer/End User: DNO
Solution: 79,500 BPD oil dehydrator equipped with two power units, bushings, inlet distributor, electrode grids, oil & water collector headers.
Delivered: 2021

Selected References Brownfield Process Packages & Mod.

Kikeh FPSO, Malaysia

Customer/End User: Murphy/Petronas
Solution: ToreOVD for production and test separators integrated with ToreScrub sand cleaning and disposal system. The system was removing 5 tonnes per day when started up.
Delivered: 2011

Forties Delta, UK

Customer/End User: PD&MS/Apache
Solution: Deconstructable ToreScrub sand cleaning package.
Delivered: 2019

ETAP, UK

Customer/End User: BP
Solution: Supply of rental desanders to remove sand in produced water to reinjection pump. 37 tonnes of solids were removed monthly.
Delivered: 2014

Heidrun, Norway

Customer/End User: Aibel/Equinor
Solution: Seawater skid for Maria field. The system consists of two stage filtration removing particles larger than 5 µm. The skid also includes an air receiver and a gas scrubber.
Delivered: 2016
