## Bringing Service and Repair to You in Angola

NOV's Fleet Care program brings to Angola, a dedicated repair facility, situated in Sonils Luanda, that is ready to quickly provide local OEM repair, service and spare parts you need to help you succeed in the Angolan drilling market. This 73,900 square foot facility is strategically located to help reduce response and down times. With our skilled technicians in country, supported by NOV's global pool of highly competent technicians, we are geared to keeping your equipment running efficiently, so you can maximize rig uptime.

Our qualified personnel are trained in the repair of a large variety of NOV equipment. All equipment is inspected thoroughly to meet NOV's quality standards, and only OEM replacement parts are used to refurbish your equipment.

Our support for your operation goes beyond supplying equipment. By providing local service and repair through our facility, we help maintain your equipment and assist your crew.

## Four distinct divisions, supporting each other and the customer

- **NOV Repair Facility** — supported by two 15 Ton overhead cranes with hook heights of 6.0 meters, with the ability to lift 30 tons combined.
- **Machining Facility** — including CNC Horizontal borer, 2500mm dia. CNC Vertical Lathe, 3x CNC Lathes.
- **Welding / Fabrication Facility** — including specialised welding, custom fabrications, PCE repair, onshore and offshore.
- **Specialised Coating Facility** — including blasting & painting, Xylan Coating, and Phosphate coatings.
