

Manifold Rentals for North America Land Market

We offer land rig manifold rentals for short-term, medium-term, and long-term plans, increasing the flexibility of your operations.

Renting allows you to avoid equipment certification and documentation and reduces rig capital expenditures. A fixed price rental provides a solid budget for capital equipment use. We provide global technical support and replace valves from inventory rather than repairing existing valves, reducing your rig downtime and saving you money on repair costs.

To find out more about our rentals or to contact an NOV representative, access our rentals application at https://go.nov.com/#rg_rentals.

HSE
