

Pulling Aboard With BLM Products

A reputation of excellence in mooring and
anchoring solutions

Pulling Aboard With BLM Products

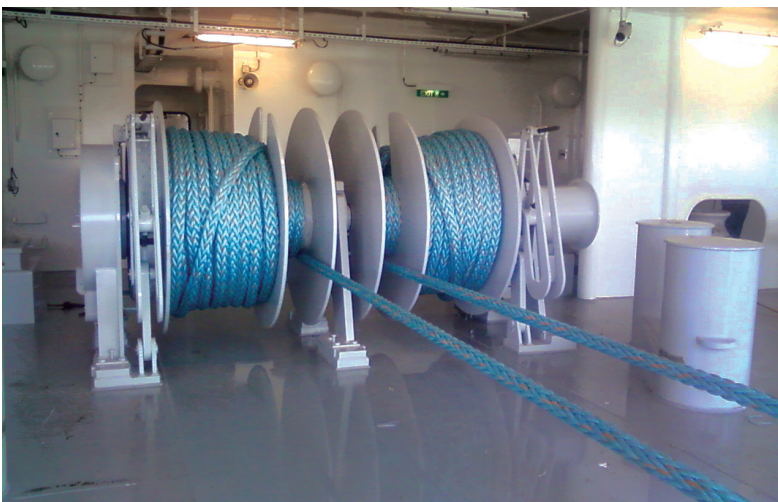

A reputation of excellence in mooring and anchoring solutions.

National Oilwell Varco's BLM group has been manufacturing deck machinery since 1841, and has developed systems for various mooring and anchoring applications:

- Cruise liner, ferry
- LNG carrier, oil tanker
- Container ship, multipurpose carrier
- Special vessels, including platform supply vessels and heavy lift carriers

Our market comprises ship-owners and shipyards worldwide for electric deck machinery, including:

- The COMPACWINCH™, which is especially developed for narrow spaces and allows easy and safe operation
- Conventional Electric deck machinery to cover the basic demand, even in hazardous area (zone 2)

NOV's BLM Plant in Carquefou - Nantes / France

BLM's products and services include various options for our customers' specific needs. These major options include:

- Remote band brake for windlass and/or mooring winch
- Mooring brake with adjustable setting
- Automatic mooring system
- Load monitoring system for mooring
- Centralized control station
- Portable control post
- Wheelhouse panel
- Automatic clutch
- Chain stopper (manual or automatic)
