

OC-L Series Cranes

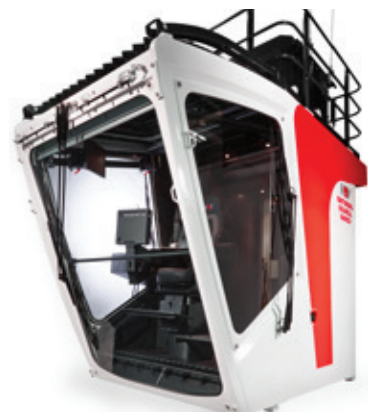

Your partner for a Lifetime of Lifting

Designed with your operational challenges in mind, the OC-L series cranes answer the industry's calls for increased uptime, while providing better safety features for your people and installations. We partner with you through the full lifecycle of your crane to ensure high availability and low cost of ownership.

The OC-L crane series are precision engineered to meet the latest rules and regulations and certified for personnel and MOB boat lifting. The cranes delivers the best weight/capacity ratio of its class and offers outstanding off-board lifting capacity.

A notable improvement is the new cabin design to ensure unobstructed views for enhanced safety and comfort.

OC-L Series Cranes

The OC-L series offers some of the of the safest, most precise cranes on the market today. The cranes state-of-the art technology makes them market leaders when it comes to reliability.

Technical Specifications

Crane model	Overturning moment (kNm)	Radius (m)	SWL (mt)
OC1800L	5,000 - 10,000	25 - 35	25 - 45
OC2400L	10,000 - 18,500	30 - 45	25 - 65
OC3050L	18,500 - 35,000	35 - 55	45 - 80
OC3550L	35,000 - 45,000	45 - 70	50 - 125
OC4300L	45,000 - 70,000	45 - 80	75 - 300
OC5200L	70,000 - 112,000	45 - 99	150 - 450

Key Features

- Substantial off-board lifting capacity with world-class weight/capacity ratio on long reach
- Excellent hoisting, luffing, and slewing speeds ensure safe operations – even in harsh conditions
- Simple design provides easy access and reduces life cycle cost (low maintenance cost)
- Modular layout supports fast installation and flexible logistics, both for new-builds and replacements
- Available with all-electric, electric-hydraulic, diesel-electric or diesel-hydraulic prime drivers

Relevant for all types of installations:

- Fixed platforms
- Jackups
- FPSOs
- Drillships
- Semisubmersibles
